

**ENGINEERING A
CLEANER FUTURE**

The logo for AIC Group features the letters 'AIC' in a green, sans-serif font, followed by a green swoosh that curves over the 'G' and 'r' of the word 'Group'. The word 'Group' is written in a blue, sans-serif font.

AIC Group

Environmental Engineering

ENGINEERING A CLEANER FUTURE

AIC Group was founded on the premise of creating a cleaner, greener future through cutting edge environmental and waste management engineering practices to ensure that our clients gain both financial and environmental benefits from our products.

We manufacture to order based on each individual clients specific requirements taking into account your waste stream, current expenditure, site specific elements and biosecurity needs to ensure that we manufacture the best possible option to solve your waste disposal issues.

INNOVATION THROUGH CONSULTATION

At AIC we ensure that each individual customer experiences a tailored production journey that starts with waste stream analysis. We then take into account current expenditure and site specific requirements to ensure that each and every customer receives the best possible service and that we manufacture the best possible solution to your waste disposal or waste to energy needs.

A large pile of waste, including plastic bags, cardboard, and other debris, is shown under a cloudy sky. A yellow bulldozer is visible in the background, working on the waste. A green rectangular box is overlaid on the left side of the image, containing the text "TRANSFORMING YOUR WASTE".

**TRANSFORMING
YOUR WASTE**

MAXIMUM RETURN ON INVESTMENT

Through the use of top quality materials as well as the most advanced design and testing methods, we ensure you receive maximum return on investment through long equipment lifespans, minimal maintenance requirements and the most efficient running costs possible.

With the integration of our waste to energy systems you can also see large savings on your heating bills, utilising the energy gained from the incineration process to generate hot water for use in heating systems and as process water.

**RETURN ON
INVESTMENT
TIMESCALES
FROM 1.2 YEARS**

UNCOMPROMISED BUILD QUALITY

We pride ourselves on the robust construction and high quality of our equipment. Our time served manufacturing team ensure that each and every machine that is produced is built to last. Our equipment operates in the harshest environments and is built to outperform any other options available.

**DESIGNED &
BUILT TO LAST**

TOMORROW'S SOLUTIONS TODAY

At AIC we ensure we are ahead of the curve through the utilisation of 3D CAD modelling and various simulation software. This combined with the use of the highest quality and most technologically advanced materials and control systems ensure we offer the most advanced solution to your waste issues.

**LET'S TAKE A
CLOSER LOOK AT
OUR RANGE...**

EcoBurn – AGRI AGRICULTURAL WASTE

AIC delivers highly efficient solutions for safely disposing of all types of agricultural farm waste. Delivering the optimal solution for the farming industry worldwide. Purpose built to reliably destroy all of your fallen stock and animal waste and ensure that you have the best solution to maintain your farm safety we will work closely with you to match the right farm incinerators to your business requirements.

All AIC EcoBurn AGRI incinerators comply with EU Animal By-Products Regulation, (EC) No 142/2011 and pass international standards.

EcoBurn – MSW GENERAL WASTE

Worldwide, the problem of waste accumulation is reaching threatening proportions. Landfill options are showing more and more weaknesses and are becoming extremely expensive. They are not an efficient solution. As a natural process, nature is converting landfill waste into highly dangerous matter.

The solution is simple, our general waste incinerators offer customers the most cost effective and environmentally friendly option with bespoke filtration systems designed and built to meet your pollution control needs.

EcoBurn – MEDI MEDICAL WASTE

The Medical range of waste incinerators from AIC delivers highly efficient solutions for safely disposing of all forms of hazardous, pharmaceutical, and medical waste. Delivering the perfect solution for Hospitals, Laboratories and Aid Agencies worldwide. Purpose built to reliably destroy all of your hazardous waste efficiently and economically.

EcoBurn – PET PET CREMATION

AIC pet cremators are designed to suit all types of pet cremation companies, from single chamber batch loaded to multi chamber continuous process machines. When investing into new Pet Crematoria look no further than AIC, we offer top quality machines that ensure respectful cremation as well as maximum return on investment.

Our range of pet cremators comply with the EU Animal By-Products Regulation (EC) No 1069/2009.

EcoBurn – AQUA AQUACULTURAL WASTE

The Aquacultural range of waste incinerators from AIC delivers highly efficient solutions for safely disposing of all forms of high moisture waste. Delivering the perfect solution for Fish Farms worldwide. Purpose built to reliably destroy all of your solid and high moisture waste.

Our range of Marine Waste Incinerators comply with the EU Animal By-Products Regulation (EC) No 1069/2009.

EcoBurn – MOBILE MOBILE INCINERATION

AIC offer bespoke mobile mounted incineration solutions suitable for rapid deployment to areas with sudden outbreaks of human or animal diseases or mass waste problems. Mobile incineration enables the waste to be destroyed in an effective, fast and safe environment at source ensuring increased bio-security. Our range of high capacity mobile incinerators are perfectly placed to suit any such unfortunate situation.

Our range of mobile incinerators are purpose built using only the highest quality materials for fast efficient deployment in the most demanding environments.

OUR TEAM, YOUR TEAM

We view our customers as part of our team and firmly believe that it is our duty to be here to support your needs throughout the lifetime of your equipment.

Our EcoCare service and maintenance packages offer you piece of mind with 24/7 breakdown support, experienced engineers and a range of readily available parts to minimise downtime.
